Telecom Seeds for the Future is our global CSR flagship program. It is our most heavily invested CSR activity, and we will continue with this investment globally in the long term. Initiated by Huawei in 2008, the program seeks to develop local ICT talent, enhance knowledge transfer, promote a greater understanding of, and interest in, the ICT sector, and improve and encourage regional building and participation in the digital community.

Believing that education is the key to creating opportunities, Huawei is dedicated to improving the education environment and allowing more young people to get education opportunities by leveraging the full potential of telecommunication technologies. Huawei takes the initiative to work with partners on programs that help nurture talent and transfer ICT knowledge in underserved communities around the world and encourage regional building and participation in the digital community. The China Study Trip of the Telecom Seeds for the Future program offers an excellent opportunity to experience the Chinese culture and study ICT knowledge.

We look forward to your participation, to make both our vision of "creating opportunities through education" and your future success a reality.
